

HbMAG

Conservation, operational efficiency and versatility are important to municipalities as they look for new ways to optimize service.

HbMAG is a magnetic flow meter that is designed for easy installation, superior measurement and improved operational efficiency for potable, wastewater and reclaimed water systems as well as applications where minimal head pressure loss is vital, such as fire protection systems. It provides municipal water service providers with a viable replacement for applications that previously utilized a compound or horizontal turbine meter.

HbMAG features a sensor that accurately measures water flow with minimal reduction in head pressure—allowing you to accurately account for every drop of water your customers use while conserving energy and significantly reducing pumping costs. And, HbMAG's compact and highly durable design does not contain any moving parts—which means virtually no wear and tear or maintenance costs—and it can be installed vertically or horizontally for ultimate flexibility in system retrofits and designs.

HbMAG displays detailed usage information on-site, however, it can fully integrate with Mueller Systems' two-way fixed network solution—Mi.Net® Mueller Infrastructure Network for Utilities—or Hot Rod™—Mueller Systems' advanced AMR system—for intelligent performance, diagnostics, billing accuracy and customer service, as it enables municipalities to remotely collect usage information.

Intelligence that Drives the Network.

The Mi.Net Mueller Infrastructure Network for Utilities™ is a communications network that fully automates the meter reading-to-billing process and links meters, distribution sites and control devices in a single, highly efficient data network. Mi.Net's scalability enables utilities to deploy new technologies in stages that are best suited to their needs and budgets.

3" Hersey HbMAG

Benefits of HbMAG Include:

- Accurate measurement
- Reduced long-term maintenance costs
- Improved conservation
- Reduced pumping costs
- Fully integral with AMI/AMR
- Easy installation

About Mueller Systems

Reliable Products & Services for Over 150 Years

Mueller Systems provides Smart Metering solutions to optimize the delivery and use of energy and water. Municipalities that supply electricity, water or gas — or any combination of the three services — need innovative ways to increase efficiencies, reduce costs, conserve energy and water, and improve customer service. The Mi.Net® Mueller Infrastructure Network for Utilities from Mueller Systems meets that need.

For more than 150 years, the most practical, respected and intuitive products in the water industry have been built by the company now known as Mueller Systems.

Mueller Systems offers a full line of residential, fire line and commercial meters, AMR / AMI systems and related products. We are committed to providing utilities with the infrastructure technology needed to optimize their operations and ensure the sustainability of our water. By building on our expertise in water management, we help electric and gas utilities better manage their operations and energy resources.

Mueller Systems is part of Mueller Water Products, Inc., a leading manufacturer and marketer of infrastructure and flow control products and services for more than 150 years. Mueller Water Products is continuously developing systems and components that make collecting information easier and more beneficial to utilities and their customers.
