## MI.NODE M MINI

### THE SIMPLEST AND MOST AFFORDABLE RADIO-READ WATER METER SYSTEM AVAILABLE.

Mueller Systems Mi.Net M Mini provides high-end automated meter reading capabilities in an easy-to-use solution. Who should consider the Mi.Net M Mini?

**Small Water Utilities** can benefit from a simple, low-cost meter-reading solution. Mueller Systems' Mi.Net M Mini provides smaller utilities with the ability to remotely read meters and receive important alarm messages without the need for large infrastructure investment. The Mini provides an affordable solution for reading large meters in vaults to avoid confined space entry issues and improve customer safety.

**Multi-family Residence Owners** often install meters for each residence so they can bill occupants for actual water usage rather than charging a flat rate or including fees for water usage in rent. Mi.Net M Mini is the ideal solution for these sub-metering applications. It can read meters up to 1,200 feet from the Mi.Net M Mini receiver in seconds, and it eliminates the need to enter a residence to visually read the meter.

Many **Manufactured Home Park Owners** sub-meter each lot in their parks. Mi.Net M Mini can remotely read each of these meters in seconds.

### FEATURES

- Network and read up to 1000 Mi.Node M equipped meters
- Remote meter readings and alarms such as leaks, tamper and reverse flow.
- No programming needed
- Mi.Node M equipped meters transmit through meter box covers
- Easily upgradable to a full two way mobile AMR system that is migratable to AMI
- Downloads meter readings and alarms into Microsoft® Excel
- No FCC license required
- 20-year Mi.Node M warranty
- Up to 1200 feet range
