

Nighthawk LTE Mobile Hotspot Router

Setup Instructions

Plug one end of an ethernet cable into your Nighthawk and the other end into your computer or local router. You only need to do this one time. Once you have setup the Wi-Fi you can remove the ethernet cable and subsequently connect to the Nighthawk over Wi-Fi.

From a browser type in:

http://attwifimanager

It may show up automatically after plugging the ethernet cable into your computer.

The first time you connect

http://attwifimanager it will ask to configure the SSID and password for your nighthawk. The SSID is your wireless network name.

Write down and remember the SSID and password that you have configured. Go through the setup screen. Once you are in, you will see a web page like the following.

The screenshot shows the AT&T attwifimanager dashboard. At the top, there's a navigation bar with links like 'DASHBOARD', 'MYMEDIA', and 'SETTINGS'. The main area has a title 'NIGHTHAWK MOBILE ROUTER' with a signal strength icon. Below that, there's a 'Device Information' section with details: Carrier (AT&T), Mobile Number, Signal Strength (Fair), Firmware Version (NTG9X50C_12.06.39.00), and Battery (42%). There are also sections for 'Always-on Wi-Fi' and 'Data Offloading', both set to OFF. To the right, a 'Monthly Usage' section shows '0.00 GB USED 6 DAYS REMAINING'. At the bottom, there are three tabs: 'WI-FI NETWORK' (selected), 'GUEST NETWORK', 'MESSAGES', and 'DELETE ALL'. The 'WI-FI NETWORK' tab shows a Wi-Fi icon, the SSID 'HH-Mobile-Test', and an encryption key 'WPA2_Personal_AES'. The 'MESSAGES' tab shows 'NO NEW MESSAGES'. On the far right, there are sections for 'WI-FI', 'LAN', and 'USB'.

Click on **Advanced Settings** then **Cellular**

The screenshot shows the AT&T Wi-Fi Status interface. On the left, a sidebar lists various settings: AT&T Wi-Fi Status, Setup, Security, Administration, Advanced Settings (which is selected and highlighted in blue), Cellular, Port Forwarding, Port Filtering, Device, Enterprise, and Other. The main content area is titled "CELLULAR". It contains sections for "Data" (checked), "Roaming Data" (unchecked), "Band Region" (set to AUTO), and "Network Mode" (set to Auto). Below these, there is a note about LAA (Local Area Aggregation) and a link to "Wi-Fi Profiles". Under the "APN" section, there is a table with one row. The columns are Active, APN Name, APN, PDP, PDP Roaming, and Authentication. The row shows "Active" as a radio button, "APN Name" as "ATT Broadband", "APN" as "broadband", "PDP" as "IPV4V6", "PDP Roaming" as "IPV4", and "Authentication" as "None". There are "DELETE" and "ADD" buttons at the top right of the APN table.

Then under APN Click **Add**

And click save.

APN Name: Mueller

APN: muellersystems01.com.attz

PDP: IPV4

PDP Roaming: None

Authentication: None

The access point you created should now be selected as the default access point to use for your Hotspot.

The dialog box is titled "EDIT APN". It has fields for APN Name (Mueller), APN (muellersystems01.com.attz), PDP (IPV4), PDP Roaming (None), Authentication (None), Username, and Password. At the bottom are "CANCEL" and "SAVE" buttons.
