

# Aquaient™ Ultrasonic Water Meter

This newest product features a low-profile design with a brass body for easier installation and tolerance to harsh environments. Built-in pressure and temperature sensors and communication protocols go beyond detecting possible leaks and preventing water waste. It provides near real-time data on water usage patterns, empowering utilities to improve customer service, support water efficiency, and spearhead conservation initiatives.

## Overview

Identify potential hydraulic issues, inaccurate billing, and water waste with pressure data

Avoid frozen line breaks and bacterial growth with water temperature data

Ensure faster issue resolution and minimize service interruptions with Mueller Network-as-a-Service (NaaS)

## Key Benefits

- **Low-profile design helps simplify meter access – reducing excavation and other expenses.**
- **Pressure sensor helps prevent billing errors and detects hydraulic issues that cause leaks and bursts.**
- **Temperature sensor helps enable proactive measures to prevent frozen lines and bacteria growth in pipes.**
- **Backflow detector helps provide a visual indication and alarm when backflow occur - reducing the risk of water contamination.**
- **Mueller NaaS AMI helps offer secure connectivity options to enhance wireless coverage throughout the utility service area.**
